

Reference List

1. Schmidt,S., J.Rainer, S.Riml, C.Ploner, S.Jesacher, C.Achmüller, E.Presul, S.Skvortsov, R.Crazzolaro, M.Fiegl, T.Raivio, O.A.Jänne, S.Geley, B.Meister, and R.Kofler. 2006. Identification of glucocorticoid response genes in children with acute lymphoblastic leukemia. *Blood* 107:2061-2069.
2. Ausserlechner,M.J., P.Obexer, S.Geley, and R.Kofler. 2005. G1 arrest by P16^{INK4A} uncouples growth from cell cycle progression in leukemia cells with deregulated cyclin E and c-myc expression. *Leukemia* 19:1051-1057.
3. Baumann,S., A.Dostert, N.Novac, A.Bauer, W.Schmid, S.C.Fas, A.Krueger, T.Heinzel, S.Kirchhoff, G.Schutz, and P.H.Krammer. 2005. Glucocorticoids inhibit activation-induced cell death (AICD) via direct DNA-dependent repression of the CD95 ligand gene by a glucocorticoid receptor dimer. *Blood* 106:617-625.
4. Bladh,L.G., J.Liden, A.Pazirandeh, I.Rafter, K.Dahlman-Wright, S.Nilsson, and S.Okret. 2005. Identification of target genes involved in the antiproliferative effect of glucocorticoids reveals a role for nuclear factor-(kappa)B repression. *Mol. Endocrinol.* 19:632-643.
5. Bladh,L.G., J.Liden, K.Dahlman-Wright, M.Reimers, S.Nilsson, and S.Okret. 2005. Identification of endogenous glucocorticoid repressed genes differentially regulated by a glucocorticoid receptor mutant able to separate between nuclear factor-kappaB and activator protein-1 repression. *Mol. Pharmacol.* 67:815-826.
6. Erlacher,M., M.Knoflach, I.E.Stec, G.Bock, G.Wick, and G.J.Wiegers. 2005. TCR signaling inhibits glucocorticoid-induced apoptosis in murine thymocytes depending on the stage of development. *Eur. J. Immunol.* 35:3287-3296.
7. Parson,W., R.Kirchbner, R.Mühlmann, K.Renner, A.Kofler, S.Schmidt, and R.Kofler. 2005. Cancer cell line identification by short tandem repeat profiling: power and limitations. *FASEB J.* 19:434-436.
8. Pazirandeh,A., M.Jondal, and S.Okret. 2005. Conditional expression of a glucocorticoid receptor transgene in thymocytes reveals a role for thymic-derived glucocorticoids in thymopoiesis in vivo. *Endocrinology* 146:2501-2507.
9. Ploner,C., S.Schmidt, E.Presul, K.Renner, K.Schröcksnadel, J.Rainer, S.Riml, and R.Kofler. 2005. Glucocorticoid-induced apoptosis and glucocorticoid resistance in acute lymphoblastic leukemia. *J. Steroid Biochem. Mol. Biol.* 93:153-160.
10. Ausserlechner,M.J., P.Obexer, G.Böck, S.Geley, and R.Kofler. 2004. Cyclin D3 and c-myc control glucocorticoid-induced cell cycle arrest but not apoptosis in lymphoblastic leukemia cells. *Cell Death Differ.* 11:165-174.
11. Bladh,L.G., J.Liden, K.Dahlman-Wright, M.Reimers, S.Nilsson, and S.Okret. 2004. Identification of endogenous glucocorticoid repressed genes differentially regulated by a glucocorticoid receptor mutant able to separate between NF- κ B and AP-1 repression. *Mol. Pharmacol.*

12. Bladh,L.G., J.Liden, A.Pazirandeh, I.Rafter, K.Dahlman-Wright, S.Nilsson, and S.Okret. 2004. Identification of target genes involved in the anti-proliferative effect of glucocorticoids reveals a role for nuclear factor- κ B repression. *Mol. Endocrinol.*
13. Haarman,E.G., G.J.Kaspers, R.Pieters, M.M.Rottier, and A.J.Veerman. 2004. Glucocorticoid receptor alpha, beta and gamma expression vs in vitro glucocorticoid resistance in childhood leukemia. *Leukemia* 18:530-537.
14. Kenzelmann,M., R.Klaren, M.Hergenbahn, M.Bonrouhi, H.J.Grone, W.Schmid, and G.Schutz. 2004. High-accuracy amplification of nanogram total RNA amounts for gene profiling. *Genomics* 83:550-558.
15. Pazirandeh,A., M.Jondal, and S.Okret. 2004. Glucocorticoids delay age-associated thymic involution through directly affecting the thymocytes. *Endocrinology* 145:2392-2401.
16. Riml,S., S.Schmidt, M.J.Ausserlechner, S.Geley, and R.Kofler. 2004. Glucocorticoid receptor heterozygosity combined with lack of receptor auto-induction causes glucocorticoid resistance in Jurkat acute lymphoblastic leukemia cells. *Cell Death Differ.* 11 Suppl 1:S65-S72.
17. Schmidt,S., J.Rainer, C.Ploner, E.Presul, S.Riml, and R.Kofler. 2004. Glucocorticoid-induced apoptosis and glucocorticoid resistance: Molecular mechanisms and clinical relevance. *Cell Death Differ.* 11 Suppl 1:S45-S55.
18. Sterzer,P., G.J.Wiegers, and J.M.Reul. 2004. Long-term in vivo administration of glucocorticoid hormones attenuates their capacity to accelerate in vitro proliferation of rat splenic T-cells. *Endocrinology.*
19. Haarman,E.G., G.J.Kaspers, and A.J.Veerman. 2003. Glucocorticoid resistance in childhood leukaemia: mechanisms and modulation. *Br. J. Haematol.* 120:919-929.
20. Kofler,R., S.Schmidt, A.Kofler, and M.J.Ausserlechner. 2003. Resistance to glucocorticoid-induced apoptosis in lymphoblastic leukemia. *J. Endocrinol.* 178:19-27.
